Light Carton Boxes

Balancing "Lightweighting" with "High Performance"

Eurasia | Middle East

NO.01

Achieving Lightweighting by "Substituting Thinness for Weight"

Through ultra-low basis weight coating technology, paper mills can use the amount of fiber that originally produced 110g paper to manufacture paper with the strength of 150g paper. This means 15%-20% fiber savings with same strong target. For large snack, food and beverage companies, even if each box save 10g lighter, multiplied by 2M boxes, the annual savings 20T paper which mean 340 trees.

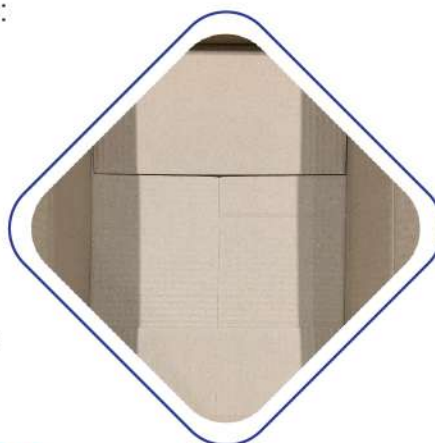

NO.02

Enhancing Surface Strength and Moisture Resistance:

The coating fills the gaps between paper fibers, making the carton box surface denser and smoother. This brings two direct benefits:

Abrasion and Scratch Resistance:

During high-speed printing and transportation, the carton box surface is less prone to fuzzing or dusting, keeping the contents cleaner.

Moisture and Penetration Resistance:

This coating layer effectively blocks moisture from the air, preventing the carton from rapidly softening and collapsing due to dampness. This is particularly crucial for fresh food with fridge or warehousing in humid regions.

NO.03

Achieving the Environmental Goal of "Replacing Plastic with Paper"

Thanks to its smooth and dense surface, this type of carton box achieves excellent printing results (such as for colorful packaging). This means it can replace some packaging boxes that require lamination (plastic film), making the boxes easier to recycle and degrade. This aligns with the current global environmental trend of "plastic reduction."

What's New for 2026?

Giant Corrugated Factory

47,000 sqm land,

2 new lines 3300 Corrugated will launch 2026

Productivity:
900M SQM, 220M boxes

Online Order System

5 Corrugated Lines with 23,000T/month
(2500mm*2 lines, 2800mm*2 line, 2200mm*1 Preprint line)

Panoramic Sales & Production Management System

LETS GOCHINA

Corrugated & Carton Box Program

What you can see?

Chinese Corrugated Factory 1

Capacity data:

12H/day, 5 days/week, 10 orders/day,
Capacity 23,000T/ month

Speed Data:

B/C 3 layers

400g: 300-350m, 600g: 270-280m,
700g+: 200-220m

BC 5 layers

650g: 270m, 800g: 180-200m

Paper Rang Data:

TL: 45-400g, FL: 70-180g

Preprint Corrugated Sheets

MCC System

Chinese Digital Printing Factory 2

Machine data:

Machine width : 2500 mm x 4600
Operation speed : 100pcs/min

Small order solution :

Single Pass Digital Printing

Machine width : 2500mm
Operation speed: 150m/min
1200dpi

Less than 10,000pcs

Less than 1,000pcs

What's New for 2026?

Corrugated Line & Preprint Corrugated Line

- 2800mm, 400m/m,
- Low & High GSM solution
- In-Plant Logistics System
- MES (Manufacturing Execution System)
- WMS (Warehouse Management Systems)

Jumbo Flex Printing Inline

- Max sheet feed : 2500 mm x 4600 mm
- Min sheet feed : 650 mm x 990 mm
- HD Printing with coated Corrugated sheet
- Preprint Line

One Pass Digital Printing

- White ink on brown paper
- Less than 1,000pcs order

What's New for Corrugated Festival?

What Do We Offer to Buyers

5 nights four/five stars hotel accommodation

B2B meeting with trustworthy suppliers

Establish long-term connection with manufacturing bases

Professional translation and business consulting service

Four Major Parts of Our Matchmaking Solution

Quality Control

All the suppliers in our China Manufacturing Database are divided by our rating system, according to their manufacturing capacity, export experience, and credit record. Only verified suppliers and products with certificates will be introduced to you.

Price Negotiation

Not familiar with Chinese market and hoping for a best price? Don't worry. We do price negotiation for you. Professional advice based on years of market knowledge will be available at any time. Maximum profit margins secured.

Factory Visit

Witness the manufacturing capability of your potential partners by your own eyes. 5-8 factories during one trip to China. We'll pre-select your ideal supplier and make all the arrangement for the visit. Just tell us what product you're looking for and leave all the rest to us.

Technical Consultant

We work with TOP level technical experts team from Engineering - stock preparation – paper-making . One-stop service to suitable proposal and solution. More than 10 experts are waiting for you.

Lets GoChina 2026

ITINERARY

DATE	EVENTS	DETAIL
Day 1 [25 th Oct] Sun	Arrival	Afternoon: China Guangzhou Airport pick-up
Day 2 [26 th Oct] Mon	Factory visiting & Conference Day	Morning: Corrugated Line + Automated In-Plant Logistics System Conference Afternoon: Visit 1 Giant Corrugated Factory ; Visit 1 Corrugated Line Manufactory Dinner: Sino Corrugated Night
Day 3 [27 th Oct] Tue	Factory visiting & Conference Day	Morning: FFG Printing + Digital Printing Conference Afternoon: Visit 1 Carton Box factory Visit FFG Printing + Digital Printing Machinery Manufactory Dinner: Sino Carton box Night
Day 4 [28 th Oct] Wed	Exhibition Day	Visit China International Corrugated& Folding Carton Festival with 300 Chinese suppliers
Day 5 [29 th Oct] Thur	Exhibition Day	Visit China International Corrugated& Folding Carton Festival with 300 Chinese suppliers
Day 6 [30 th Oct] Fri	Sightseeing	Morning: City sightseeing Afternoon: Shopping time Night: Go to airport
